Mr. Joe D. Ramey
Secretary-Director
Box 2088
Santa Fe, New Mexico 87501

Dear Mr. Ramey:

Re: MESA PETROLEUM CO. State Com H 4A, 1850' fr N ln and
1560' fr W ln, Unit F, Section 32, T31N-R9W, San Juan County,
New Mexico - DUAL - Mesaverde and Pictured Cliffs

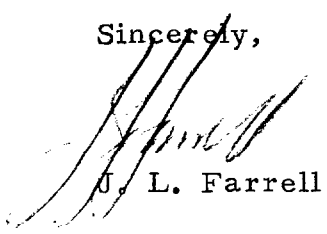

In accordance with Commission Rule 303 and the Commission "Manual for the Installation and Operation of Commingling Facilities," we hereby apply for permission to commingle the condensate liquids from the subject well completed in the Blanco Mesaverde and Pictured Cliffs gas pool underlying a commonly-owned lease.

Condensate yields from the Blanco Mesaverde and Pictured Cliffs completions are expected to be two barrels per MMCF and 0.7 barrels per MMCF respectively.

Proration of liquids to their respective producing formation will be based on semi-annual gas-oil ratio tests. The results will be filed with the Commission on Form C 116.

Attached is a schematic diagram of the commingling installation.

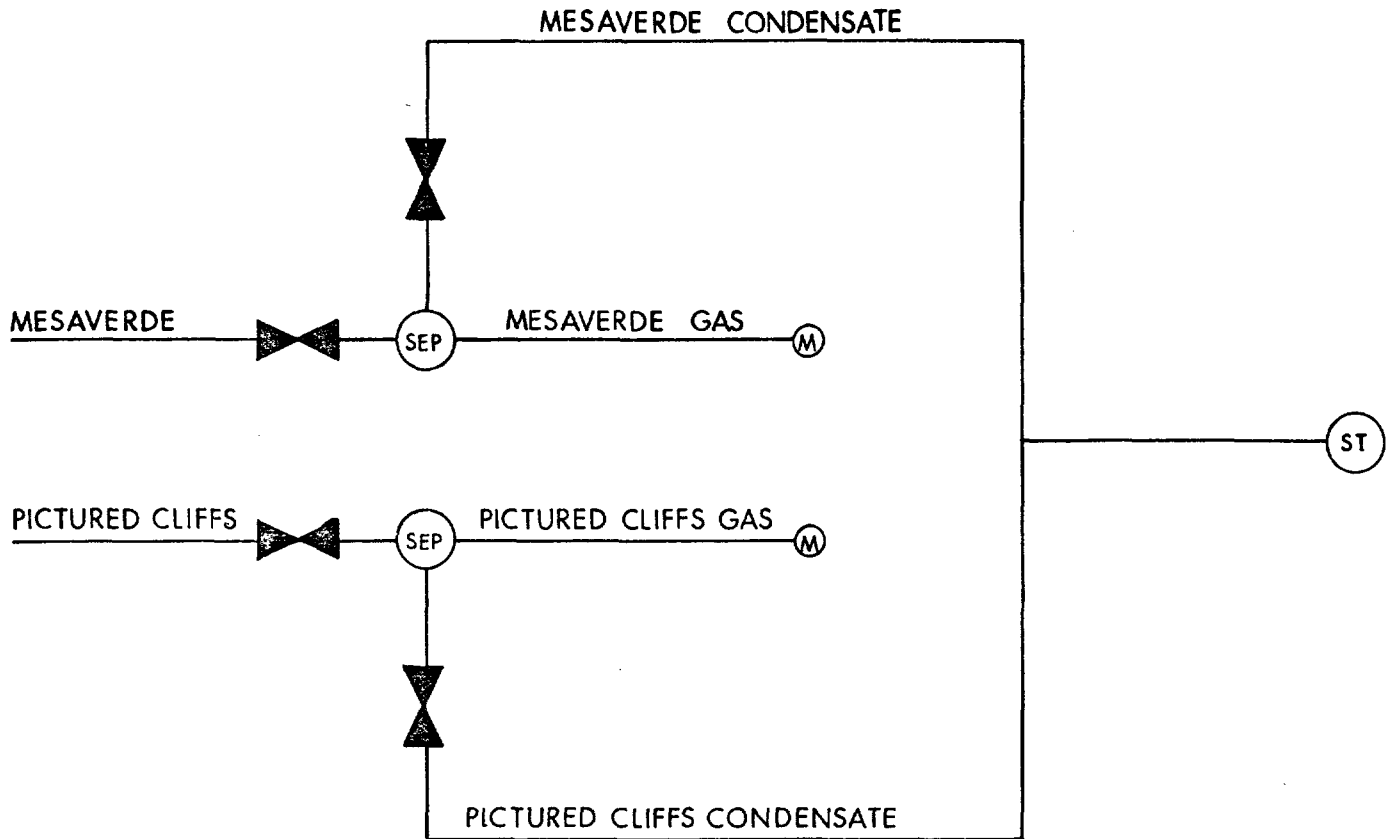

Sincerely,

J. L. Farrell
