Dear Sir:

In order to avoid considerable expense in maintaining two tank batteries for the subject lease, Gulf hereby seeks an exception to Administrative Rule #303. This will allow Gulf to commingle production for the Blinebry, Drinkard and Tubb Pools. All wells will be tested periodically for allocation of production.

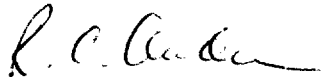

The attached tabulation shows the volumes, gravities, and monetary values of the liquid hydrocarbons from individual pools, as well as the commingled production. The tabulation shows the total average daily production for a 2 month period.

The calculated revenue from the commingled production will increase \$0.00 per day due to the addition of the Blinebry Oil due to the closeness of the value of each pools gravity.

Also attached is a schematic diagram of the storage facilities for the commingled production and a lease plat. Western Crude Oil, Inc. has agreed to purchase the commingled production herein.

The commingling proposal is in the interest of conservation in that it prevents unnecessary waste and production expense.

Yours very truly,

R. C. ANDERSON

RE: Well #15 of A.L. Christmas
N.C.T.C. lease sec. 18-22S-37E

ATTN: R.C. Anderson:

Dear Mr. Anderson,

This letter is to advise you that Getty Trading and Transportation will continue to purchase the commingled Blinbery and Drinkard production from the captioned lease.

Yours truly,

A handwritten signature in dark ink, appearing to read 'R.D. Hagar'. The signature is fluid and cursive, with a long horizontal stroke at the end.
