B Lee State Lease
Vacuum ABO and Vacuum (G-SA) Pools
Surface Comingling
Exception to Rule 303-A

Gentlemen:

We respectfully request permission to surface comingle the production from our B Lee State Lease. We have plugged back Well #5 from the Vacuum ABO to the Vacuum (G-SA) successfully. The other three wells on this lease are producing from the ABO Reef. They are located in Section 7, Township 18S and Range 35E in Lea County.

Production for the lease is into a common tank battery and the amount from each pool will be determined by metering Well #5. All wells are marginal. Reservoir damage or waste will not result from said comingling. The value of comingled production is not more (or less) than the totals of each common source. Volumes and gravities from each pool are as follows:

<u>Pool</u>	<u>Volume Oil</u>	<u>Water</u>	<u>Gas</u>	<u>Gravity</u>	<u>Value</u>
Grayburg-San Andres	14 BPD	69 BPD	6.0 MCF	35.8	\$14.34
ABO Reef	56 BPD	56 BPD	57.3 MCF	38.7	\$ 5.95
Total Comingled Prod.	70 BPD	125 BPD	63.3 MCF		

Yours very truly,

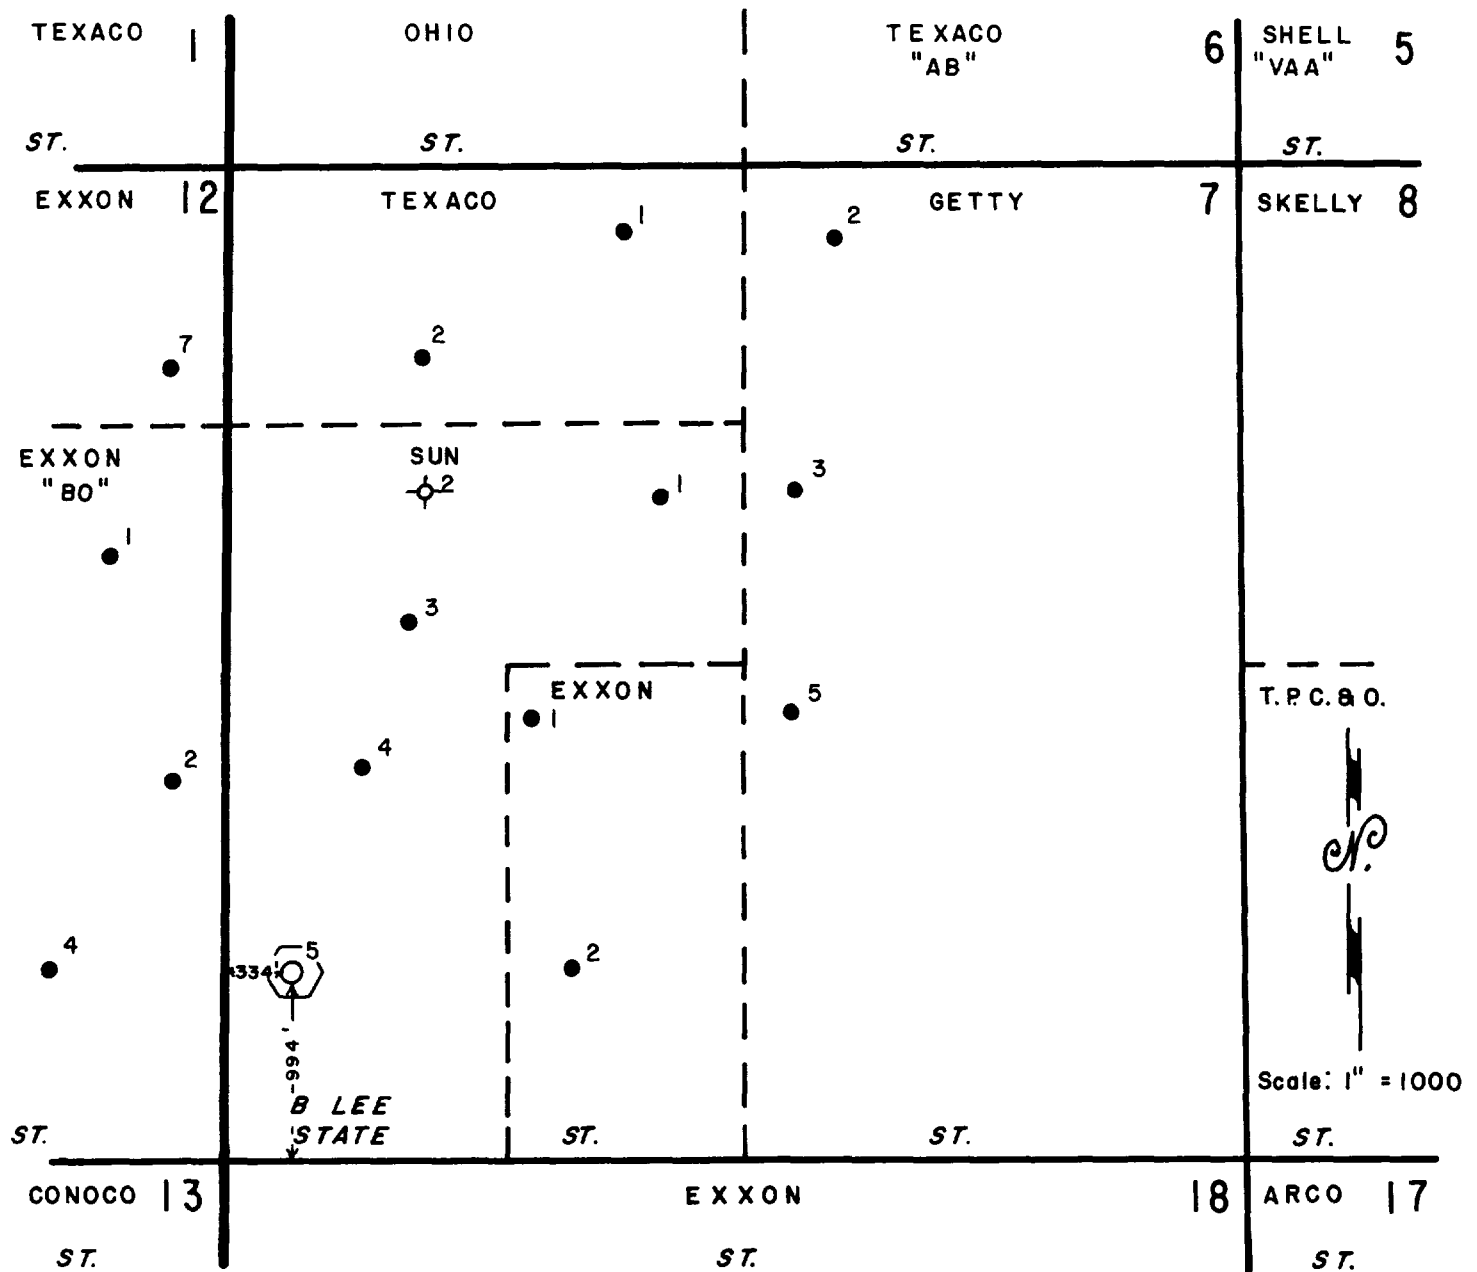

SUN OIL COMPANY
