Surface Commingling Application
J. L. Greenwood Lease
Sec. 9 T-22-S, R-37-E,
Lea County, New Mexico

New Mexico Oil Conservation
Commission
P. O. Box 2088
Attn: Michael Stogner
Santa Fe, New Mexico 87501

Gentlemen:

Exxon respectfully requests administrative approval to surface commingle all oil and condensate production on the captioned lease. The schedule below indicates the current commingled facility configuration:

Tank Battery 1

Well	Pool	Latest Tests			API Gravity	Applicable DHC Orders	Applicable PC Orders
		Oil	Water	Gas			
11-U	Blaine	0	0	124	N/A	593 2/4/86	202 12/2/68
11-L	Drink	3	1	17	36.3	" "	" "
14	Paddock	25	31	21	36.3	N/A	" "

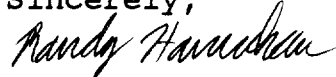

Tank Battery 2

Well	Pool	Latest Tests			API Gravity	Applicable DHC Orders	Applicable PC Orders
		Oil	Water	Gas			
12	Ellen	1	4	1	37.6	N/A	602 6/29/81
13-M	Fussel	3	1	2	37.6	N/A	" "
13-U	Blaine	0	0	92	N/A	R-6652 4/14/81	" "
13-L	Tubb	1	0	34	37.6	R-6652 4/14/81	" "

Royalty ownership is common for all pools and since production is marginal we request that allocation to the individual well completions be based on periodic well tests. With the gravities being similar and battery 2 having relatively low production we expect no significant value differences from the commingling of the streams.

Attached for your information is a lease plat and facilities diagram. Your favorable consideration of this application will be appreciated. If there are any questions please contact me at (915) 686-4494.

Sincerely,

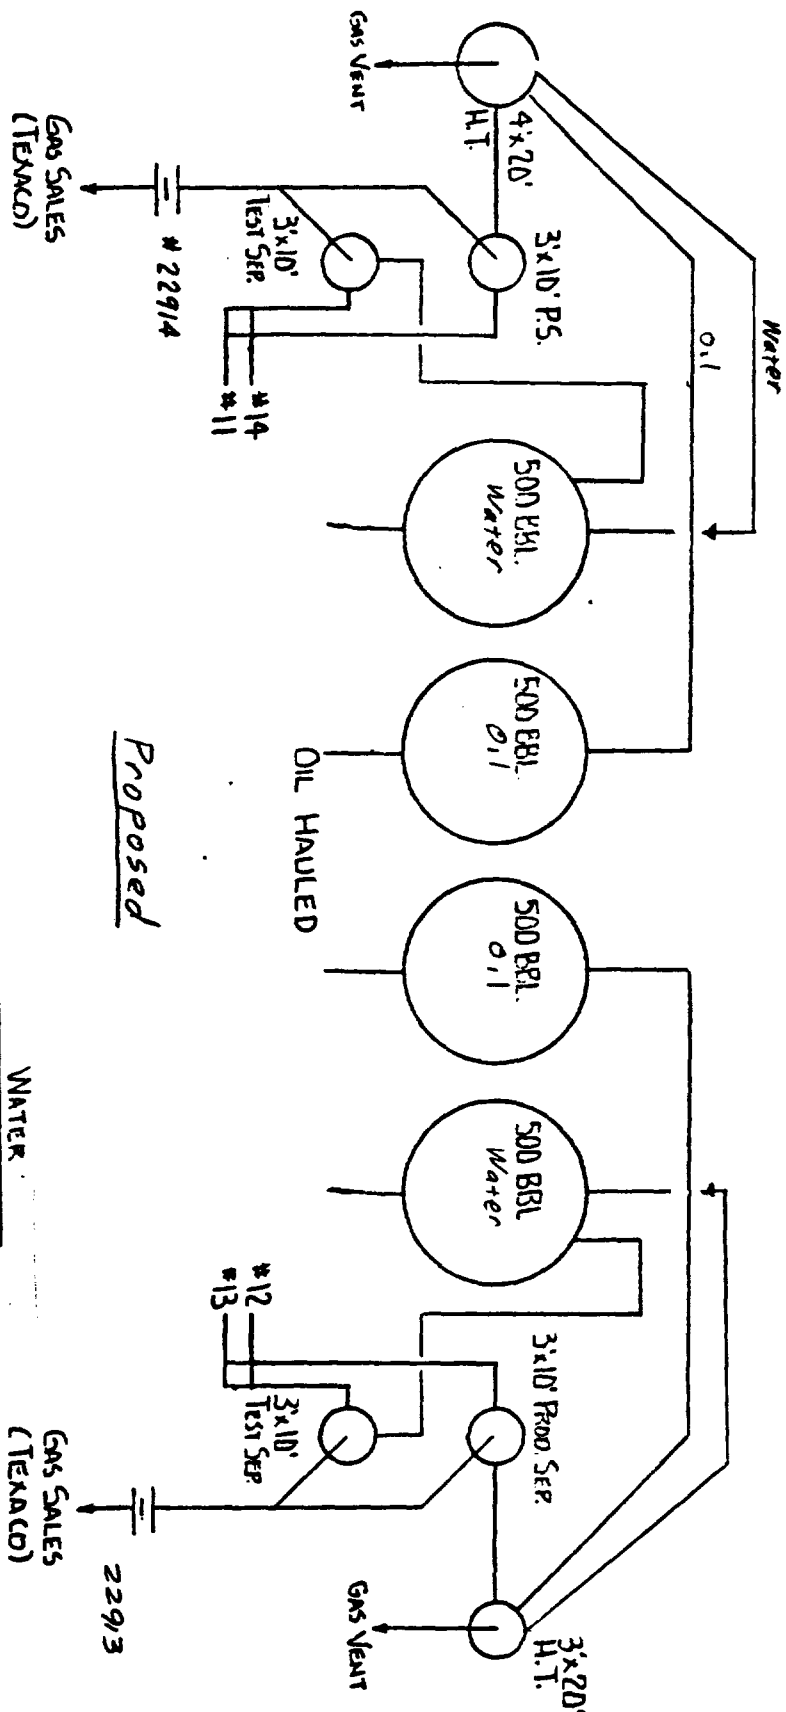

A handwritten signature in cursive script that reads "Randy Hanrahan".
