Dear Mr. Graham:

Consolidated Oil & Gas, Inc. hereby requests administrative approval to surface commingle the liquid hydrocarbons produced from this dually completed gas well. Low production volumes make it uneconomical to install separate tanks for each zone. The ownership interests of this well are the same for both zones.

As a result of our evaluation of current production and the producing characteristics of this well we have determined that a suitable allocation for the commingled liquid hydrocarbons is Dakota 60%, Mesa Verde 40%.

Attached please find a lease plat, an equipment diagram, and a data sheet of information supporting our request.

Very truly yours,

Barbara C. Rex

Although previous liquid hydrocarbon production has not been allocated we suggest allocating all future production. (Ownership interests are the same for both zones.) Dakota 60%, Mesa Verde 40%.

Gravity: 66.2 @ 60°

Gravities are on file for each zone but no adjustment is made for gravity variance by purchasers of "Four Corners Sweet Crude". Payment by purchasers during 1983 has been approximately \$29 per barrel with no adjustment for gravity.
