Energy and Minerals Department
P.O. Box 2088
Santa Fe, New Mexico 87501

Exxon Company, U.S.A., as operator, is hereby making application for an exception to Rule 303-A to permit commingling in common facilities at the South Four Lakes Unit in Lea County.

This unit produces from both the Penn and Devonian formations. The Penn production averages 28 BOPD at 50 degrees gravity and the Devonian production averages 20 BOPD at 53 degrees gravity. We expect no significant gravity and value differences from the commingling of these streams.

Attached is a schematic diagram of the proposed installation and a plat showing the location of all wells and related pools. If you have any questions, please contact Randy Hanrahan at (915) 686-4494.
