Attention: Mr. S. J. Mathews, Jr.

Gentlemen:

Reference is made to your request dated May 14, 1964, for authority to commingle San Andres and Paddock production from your State 5-27 Lease and San Andres, Paddock, and Yates production from your State 4-27 Lease in Section 27, Township 17 South, Range 35 East, Lea County, New Mexico.

No action has been taken on this application inasmuch as we have not yet received the approval from the Commissioner of Public Lands for the State of New Mexico to this commingling.

We assume that your application of May 14 supersedes your previous application dated April 27, 1964. An inspection of both applications, however, reveals that no schematic diagram of the actual commingling installation has been filed, and we are unable, from the word description of the installation in the application, to determine if the installation will comply with the Commission "Manual for the Installation and Operation of Commingling Facilities." Please submit the aforesaid schematic diagram and we will be happy to process the application upon receipt of approval from the Commissioner of Public Lands.

Very truly yours,

Daniel S. Nutter
Chief Engineer

COMMISSION ON THE STATUS OF WOMEN

REPORT

1975-1976

CHAPTER 1

Introduction

1.1. The Commission was established in 1975

1.2

The Commission was established in 1975 to study the status of women in the United States and to report to the President and Congress. The Commission was composed of 15 members, including 10 women and 5 men. The Commission's report is divided into two volumes. The first volume, "The Status of Women in the United States," contains the Commission's findings and recommendations. The second volume, "The Status of Women in the World," contains information on the status of women in other countries.

The Commission's report is based on a wide range of sources, including government data, academic research, and public opinion polls. The Commission also held numerous public hearings and received many suggestions from women's organizations and individuals.

The Commission's report is a landmark document in the history of women's rights in the United States. It provides a comprehensive overview of the status of women in the United States and offers many valuable recommendations for improving their status.

Re: Request to Commingle production
from San Andres, Paddock and
Yates pools on State Leases
5-27 (B-1839) 4-27 (B-1840)
Sec. 27, Twp. 17S, Rge 35E.
Lea County.

Gentlemen:

Since ownership is common throughout the proposed operation and since the State will not lose any royalty through commingling, this office approves your request.

The Commissioner of Public Lands, however reserves the right to amend or withdraw this approval should there be any change in which the State would lose in royalty.

Very truly yours,

E. S. JOHNNY WALKER
COMMISSIONER OF PUBLIC LANDS

Gentlemen:

Attached are three certified copies by purchaser of Standard Oil Company of Texas, A Division of California Oil Company's application for covering San Andres and Padlock production from the State A-27 (2-1839) Lease with San Andres, Padlock and Yates production from the State A-27 (2-1840) Lease. These copies are being furnished in compliance with application submitted May 17, 1934.

Please advise if we can supply additional information in regard to this application.

New Mexico Oil Conservation Commission
P. O. Box 1980
Hobbs, New Mexico

Gentlemen:

Standard Oil Company of Texas, a Division of California Oil Company, respectfully requests administrative approval to commingle San Andres and Paddock production from the State 5-27 (B-1839) Lease with San Andres, Paddock, and Yates production from its State 4-27 (B-1840) Lease. All wells are located in Section 27, Range 35 East, Township 17 South, Lea County, New Mexico and have identical working interests and royalty interests. Following is a resume' of this production:

<u>Lease</u>	<u>Formation</u>	<u>March Production (Bbls.)</u>	<u>Gravity</u>	<u>Value</u>
State 5-27	San Andres	3122	38° API	\$2.89
	Paddock	Recent Completion	38° API	2.89
State 4-27	San Andres	4780	38° API	2.89
	Paddock	1033	38° API	2.89
	Yates	139	38° API	2.89

The State 5-27 San Andres production will be processed through existing metering and separation facilities located on the lease prior to being transferred to tankage on the State 4-27 Lease. The State 5-27 Paddock production, at present one well with probable maximum of four wells, will be moved directly to the State 4-27 battery site where metering and separation facilities are installed.

The State 4-27 Lease production from four San Andres, four Paddock, and a single Yates producer will be processed through existing facilities and commingled in the State 4-27 battery.

Production will be prorated to the individual wells through periodic well tests utilizing metering separator on the two leases.

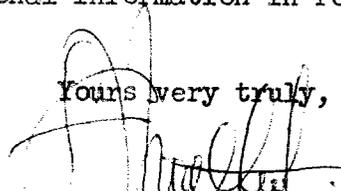

Attached is a copy of the Purchaser's Waiver being sent to Texas-New Mexico Pipeline Company and a Lease Plat showing existing wells along with proposed locations. This is being sent for your consideration to expedite this proposal. We anticipate early approval of the attached waiver and will transmit another copy as soon as executed.

Amendment
Administrative Order PLC-12

Gentlemen:

Reference is made to your letter dated September 28, 1964, wherein you advise that the Laddock zone referred to in Administrative Order PLC-12 is now designated by the Commission as Vacuum Glorieta.

Administrative Order PLC-12 is hereby amended to authorize commingling of "San Andres, Glorieta, and Yates production" rather than "San Andres, Laddock, and Yates production."

Very truly yours,

A. L. Porter, Jr.
Secretary-Director

ADMINISTRATIVE ORDER PLC-12

New Mexico Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

Administrative Order PLC-12 authorizes commingling of San Andres, Paddock and Yates production on our State 5-27 and State 4-27 Leases in Section 27, Township 17 South, Range 35 East, Vacuum Field, Lea County, New Mexico. The Commission now designates the Paddock zone to be in the Vacuum (Glorieta) Field; therefore, the Paddock production referred to in our request dated May 14, 1964, and in administrative order PLC-12 is actually Glorieta Production.

It is respectfully requested that Order PLC-12 be amended to authorize commingling of "San Andres, Glorieta and Yates production" instead of "San Andres, Paddock and Yates Production".

Very truly yours,

H. F. Copeland
District Superintendent

Amendment
Administrative Order PLC-12

Reinstatement
Administrative Order CTB-121

O
Gentlemen:

P
Reference is made to your letter of November 13, 1964, addressed to our Hobbs office, wherein you state that the Vacuum Glorieta production from your State 4-27 and State 5-27 Leases will in the future be handled by a separate ACT unit to be transferred to Texas-New Mexico Pipeline Company's sweet crude line. This production is currently being commingled with the Vacuum Yates and Vacuum Grayburg San Andres production.

Y
Administrative Order CTB-121, which originally authorized the commingling of the Glorieta production from the two subject leases, allocating the production upon the basis of periodic well tests, is hereby reinstated. Administrative Order PLC-12, which authorized the commingling of production from the three zones underlying the two leases, is hereby amended to delete the Glorieta production from the commingling authority contained therein.

Very truly yours,

A. L. Porter, Jr.
Secretary-Director

ALTERATION OF COMMINGLING PRACTICE,
PLC-12 AND ACT PERMIT NO. I-121
VACUUM (YATES), (GRAYBURG-SAN ANDRES)
AND (GLORIETA) FIELDS

New Mexico Oil Conservation Commission
P. O. Box 2045
Hobbs, New Mexico

*Amend PLC-12
to delete the
reference
Reinstated B-121

527*

Gentlemen:

Negotiations have been completed and pipeline approval received for the sale of Standard's Vacuum (Glorieta) Field production on State 4-27 and 5-27 leases as sweet crude rather than to the sour line as presently occurring. This will effect an increase in royalty amounts to the State and, of course, to Standard. To facilitate such arrangement an alteration will be required in our commingling practice as authorized by PLC-12. Also a change will be called for in the amount and origin of crude delivered through the ACT unit covered by ACT Permit No. I-121.

Under PLC-12, records should be altered to reflect that only Vacuum (Yates) and (Grayburg-San Andres) Field production from Standard's State 4-27 and 5-27 leases will be commingled, with the same metering, testing and storage facilities as were previously inspected and approved by your office. This combined crude will go to three 500 bbl storage tanks on the State 4-27 battery site (these are the same tanks used for emergency storage to the LACT under present arrangements). The daily amounts of oil involved here will be 325 - 350 BPD which will be sold conventionally from this tankage to Texas-New Mexico's sour crude line.

The Vacuum (Glorieta) Field production from State 4-27 and 5-27 leases will be kept separate throughout its metering and treating. It will be stored in three separate 500 bbl tanks, from which it will be sold through the presently operating ACT unit (covered by ACT Permit No. I-121) to Texas-New Mexico's sweet crude line.

It is felt no formal applications for change in these two matters are required. Basically it is planned to remove the Glorieta production

*4-27 5-27
24-4*

CTB-1

New Mexico Oil Conservation Commission
November 13, 1964
Page 2

from the commingling authority and remove the Yates and Grayburg-San Andres
production from the ACT authorization.

Your early consideration and concurrence in these plans is solicited.

Yours very truly,

D. C. Helm
Production Foreman
