Midland, Texas 79701

Attention: Mr. Curtis C. McFarland

Gentlemen:

Reference is made to your application dated September 10, 1968, for administrative authority to install a commingling installation on your Belcher and Belcher "A" Leases in Section 7, Township 22 South, Range 38 East, Lea County, New Mexico.

Please be advised that inasmuch as there is a variation of ownership between the two leases it will be necessary to meter all production from each lease prior to commingling. The schematic diagram attached to your application shows meters installed on the Tubb and Blinebry legs of the Belcher "A" header and on the Tubb leg of the Belcher header. It will be necessary to also have a meter on the Drinkard leg of the Belcher header in order for this installation to be eligible for administrative approval.

Very truly yours,

DANIEL S. NUTTER
Chief Engineer

DSN/esr

Re: Application of Mabee Royalties,
Inc., for administrative approval
of zone and lease commingling of
production on its Belcher and
Belcher "A" Leases, Section 7,
Township 22 South, Range 38 East,
Lea County, New Mexico

Gentlemen:

Mabee Royalties, Inc., is the operator and part interest owner of the forty acre Belcher Lease located in the SW/4 SW/4, Section 7; and the forty acre Belcher "A" Lease located in the SE/4 SW/4, Section 7, Township 22 South, Range 38 East, Lea County, New Mexico. Commission Order PC-344 dated January 26, 1968, granted permission for operator to commingle Drinkard and Tubb production from the Belcher No. 1. An application has been filed to commingle Tubb and Blinebry production from the Belcher "A" No. 1. Applicant now proposes zone and lease commingling of production from the several zones and leases as outlined below:

1. Three oil zones: Blinebry, Tubb, and Drinkard.
2. Assuming top allowable completion on wells from the Blinebry and Tubb on the Belcher "A" Lease, the daily average production will be 78 barrels of 39 gravity oil from the Blinebry and 103 barrels of 39 gravity oil from the Tubb with a total non commingle value of \$599.74. The present production from the Belcher Lease is 8 BOPD of 39 gravity from the Drinkard and 27 BOPD of 39 gravity from the Tubb for a non commingle value of \$109.90. The composite gravity will be approximately 39 gravity for a total commingled value of \$709.64, or the same as if these leases were not commingled.
3. A substantial savings in equipment would result from the commingling as outlined.

Page Two
New Mexico Oil Conservation Commission
September 10, 1968

4. The royalty ownership is common to both leases, however, the working interest is not thus necessitating metering of the produced products. The proposed method is to meter the Blinebry and Tubb on the Belcher "A" Lease, and the Tubb on the Belcher Lease, and by the subtraction method determine the production for the Drinkard Horizon.
5. All interested owners on the leases in question are as shown below and each has been furnished a copy of this application.

Dear Mr. Nutter:

Please find enclosed revised schematic drawing and tank battery installation for the Mabee Royalties, Inc., Belcher and Belcher "A" Leases, Lea County, New Mexico. This provides for separate metering on all zones for both leases.

Please approve this administratively at your earliest convenience.

Very truly yours,

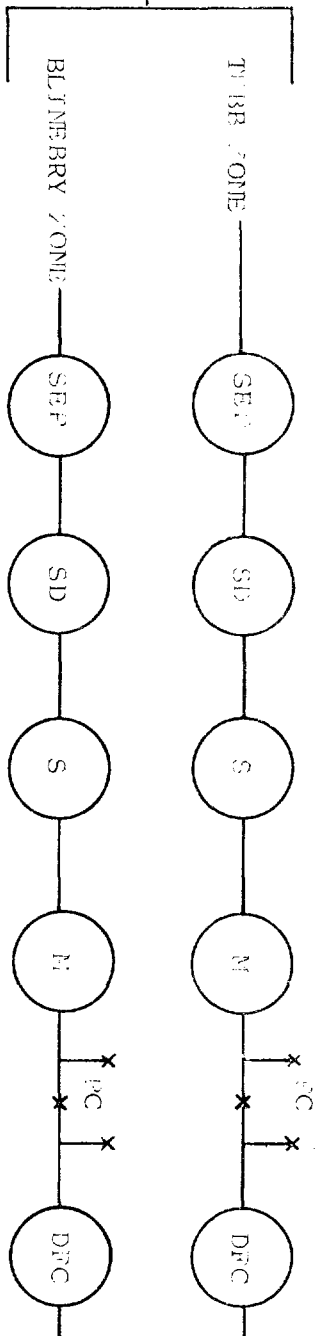

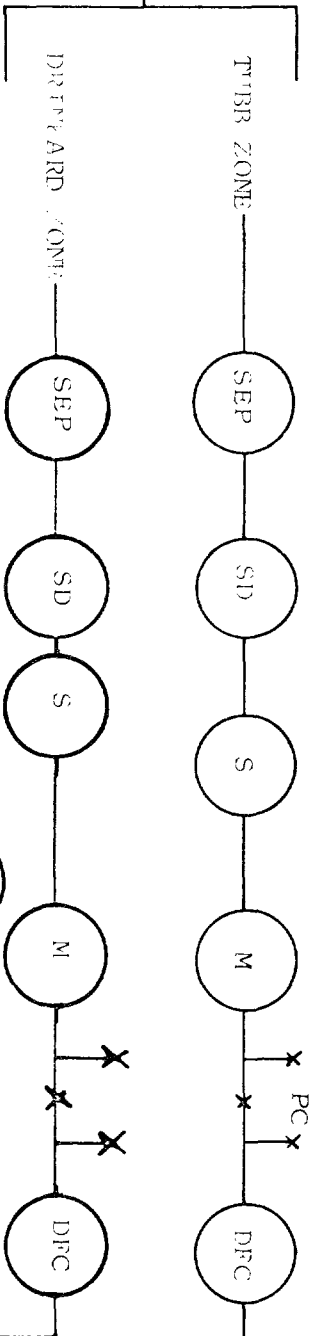

Curtis C. McFarland
