Section 20 - T21S - R37E
Lea County, New Mexico

Dear Mr. Sexton:

As you requested regarding the subject leases and our desire to commingle gas production from the two leases, I submit the following information.

1. Oil production from the two leases is currently commingled at the surface under Order No. PLC-38 (October 1971).
2. No reduction in total value from either stream is anticipated due to commingling.
3. Production is from the following pools:

Randle No. 1	Blinebry (5,603'-6,038')
Randle "A" No. 1	Drinkard (6,603'-19')
4. The commingled gas stream will be sold through the existing sales meter now serving the Randle "A" No. 1. Gas production will be allocated between the two wells based on monthly flow meter tests.
5. The necessity for commingling is a loss of gas market for the Randle No. 1 Drinkard gas production. Enron the previous purchaser on the well has declined to continue as purchaser due to the low volumes. Securing a new market and meter installations would result in economic waste due to these low volumes.

Randle "A" No. 1 (Drinkard) - 0.77
9. All parties owning an interest in the leases and the purchaser of the commingled production have been notified by registered mail.

Should you require any additional information please call me at the number below. Thank you.
