RE: Application for Unorthodox Location
Vertigo "AXV" State Com. #1, Re-entry
2310' FNL & 1980' FEL
Section 16-T6S R27E
Chaves County, New Mexico
Lease #VA-2494

Dear Mr. Stogner:

Yates Petroleum Corporation respectfully requests administrative approval for the unorthodox gas well location captioned above. The affected pools are the Wildcat Strawn at 6170' +/-, Haystack Cisco at 5812' +/-, and the Wildcat Wolfcamp at 5256' +/- . All three pools call for 320 acre spacing. Yates will designate the east half of Section 16-T6S-R27E as the dedicated acreage for each pool.

Yates Petroleum Corporation, etal as the leaseholder of Lease VA-2494 on which the well is located. Yates Petroleum Corporation, etal is also the leaseholder of Lease VA-2495 that is being encroached on to the south. The working interest in both leases are the same. See exhibit.

Re-entering this well bore would be in the best interest of conservation and also more economical than drilling a new well. Enclosed, please find a copy of the lease plat, C-101, and C-102 for the Wildcat Strawn, Haystack Cisco, and the Wildcat Wolfcamp.

Should you need anything further, please contact me at the above address or by phone at (505) 748-4347.

Sincerely,

YATES PETROLEUM CORPORATION

Drilling Plans: This well was originally drilled by McClellan Oil Corporation as the Pearl State #1. It was plugged and abandoned on 2-24-92. Yates Petroleum Corporation plans to re-enter this well bore using a pulling unit and a reverse unit to drill out the cement plugs in the 8 5/8" casing and the 7 7/8" open hole to the old total depth of 6535'. A new suite of open hole logs may be ran. After circulating the hole clean a string of 4 1/2" Casing will be ran to the total depth and cemented with enough cement to bring the top of cement to approximately 4,000'. The mud program to be used will be 9.5-9.7 ppg brine water with a 55-70 viscosity. A 3,000# BOPE will be installed on the 8 5/8" casing.

The well will be completed using a pulling unit. The well will be completed and tested in the Penn sand @ 6170', and/or the Cisco @ 5950'.
