RE: Non-Standard Location  
Global BBG #1  
Township 16 South, Range 35 East  
Section 12: 660' FSL & 400' FWL  
Lea County, New Mexico

Dear Mr. Stogner:

Yates Petroleum Corporation respectfully requests administrative approval for a non-standard Mississippian gas well, the Global BBG #1. The proposed well is located on fee minerals 660' FSL and 400' FWL of Section 12, Township 16 South, Range 35 East.

The net pay of the Brunson interval (lower Atoka) shows the sand pinching out immediately to the east of the proposed location. The enclosed geologic map was generated by integrating both well control and 3-D seismic. Cross section A-A' also indicates the Brunson sand is absent to the east. A lower Morrow sand also pinches out to the east.

A third zone of interest is the Strawn, which produces in Section 11, but not in the southern part of Section 12.

Integrating both the seismic and well control indicates that a non-standard location of 660' FSL and 400' FWL is the best choice for a well that targets three potential pay zones. This is the best location to protect correlative rights and prevent waste of recoverable oil and gas.

**Notification to the offset operators and unleased mineral owners to the west and south was made by certified mail on this date, including a copy of this application letter with all attachments.**

Yates requests that this unorthodox location be administratively approved if no objections are received within the cited twenty (20) days as required by OCD regulations, or earlier if waivers are received.

Enclosed are Forms C-101, C102, land plat, geologic maps, administrative application checklist and notification list of offset operators including letters of waiver.

Please call me at (505) 748-4351 if you need additional information. Thank you.

Very truly yours,

**YATES PETROLEUM CORPORATION**
