RE: ADMINISTRATIVE APPROVAL OF UNORTHODOX LOCATION
JICARILLA 96 #4Y
1,560' FSL & 2,340' FEL
SECTION 1-T26N-R3W
RIO ARRIBA COUNTY, NEW MEXICO

(30-039-26888)

Dear Mr. Stogner:

Energen Resources Corporation (Energen) hereby requests Administrative Approval for an Unorthodox Location of its proposed Jicarilla 96 #4Y Blanco Mesaverde/Wildcat Mancos well under the provisions of New Mexico Oil Conservation Division (NMOCD) Order R-10987-A and statewide Rule 104.

The proposed well is to be located 1,560' FSL & 2,340' FEL of Section 1-T26N-R3W, Rio Arriba County, New Mexico and dedicated to a standard 320 acre gas spacing unit consisting of the E/2 of said Section 1, in the Blanco Mesaverde gas pool.

The proposed well is closer than 660 feet to the western boundary of the proration unit, causing a non-standard location for the Blanco Mesaverde Pool and closer than 330' for statewide Wildcat wells. The well is proposed at this unorthodox location to move as far west as possible from the Jicarilla 96 #4A well located 874' FSL & 732' FEL of Section 1-T26N-R3W, which was Plugged and Abandoned on October 11, 1979.

The Jicarilla 96 #4A (API #30-039-21803) was drilled to a total depth of 6,250', completed on October 31, 1978 as a dry hole well at a plugged back total depth of 6106', before being plugged and abandoned.

As this is a replacement well we are attempting to move it to a point of greater potential thickness and better reservoir quality which was not at the standard location.

A copy of this Application is being submitted to all offset operator/owner by certified mail with a request that they furnish your office in Santa Fe a Waiver of Objection.

Attached is a well location plat showing dedicated acreage (C-102), a topographic plat of the area, and a map showing all offsetting owners.

Your favorable consideration of this request would be appreciated.

Sincerely,

Richard Corcoran
