RE: Federal 1-30 No. 1 Well  
Unit G, Section 30  
T. 32 N., R. 13 W., NMPM  
San Juan County, New Mexico

Gentlemen:

Enserch Exploration, Inc. has drilled and completed the subject Pennsylvanian Section gas well. According to current spacing regulations a standard unit for a Pennsylvanian gas well shall include 640 acres, being all of the acreage in the section in which it is located. However, Section 30, Township 32 North, Range 13 West is an irregular section containing only 501.44 acres, more or less. Therefore, pursuant to Section C, Paragraph D II of the Rules and Regulations relating to the State of New Mexico Oil and Gas Conservation Commission, Enserch Exploration, Inc. hereby requests that the following described land be approved as a non-standard unit for the subject well:

Township 32 North, Range 13 West, NMPM  
Section 30: Lots 5 through 16  
Containing 501.44 acres, more or less  
San Juan County, New Mexico

By carbon copy of this letter to the offsetting operators we are notifying them of our request for the establishment of a non-standard unit for the subject well.

Please advise if additional information is required to approve our request for the non-standard unit.

Very truly yours,

*Wm Patrick Curvin*
