Re: State "28" No. 1
W/2 SE/4 and SW/4 NE/4
Sec. 28, T-19-S, R-37-E
Lea County, New Mexico
1. Request for Non-Standard
Proration Unit
2. Request for Unorthodox
Location
3. Notice of Sec. 103 Appli-
cation

Gentlemen:

In the near future, we plan to file a C-101 and C-102 with the New Mexico Oil Conservation Division District Office in Hobbs for permission to drill a new Eumont gas well as a Section 103 well at an unorthodox location consisting of 1880' FSL and 2180' FEL Section 28, T-19-S, R-37-E. The subject well will be drilled on a presently undedicated 120-acre non-standard proration unit comprised of the W/2 SE/4 and SW/4 NE/4 of Section 28, T-19-S, R-37-E, Lea County, New Mexico. A portion of the acreage to be dedicated to the proposed State "28" No. 1 was previously dedicated to Marathon's State A-3071 "D" No. 1 Eumont gas well located 1980' FSL and 1980' FEL of Section 28. The Marathon State A-3071 "D" No. 1 was plugged and abandoned on August 11, 1978.

Therefore, we hereby file for administrative approval to drill the newly proposed State "28" No. 1 at the unorthodox Eumont location of 1880' FSL and 2180' FEL of Section 28 and also for administrative approval to dedicate the well to a new 120-acre non-standard Eumont proration unit comprised of the W/2 SE/4 and SW/4 NE/4 of Section 28, T-19-S, R-37-E.

Furthermore, if the proposed well is completed as a commercial producer, and in compliance with the Natural Gas Policy of 1978, an application will also be submitted to the New Mexico Oil Conservation Division to obtain administrative approval for the well as a Section 103 well.

As to our application for an unorthodox location, the requested location is necessitated by a combination of the narrow shape of the proposed 120-acre proration unit and the location of existing topographic obstructions. Enclosed is a plat depicting the 120-acre proration unit and existing surface facilities.

Three copies of a plat showing the location of the original well on the proposed 120-acre proration unit plus the location of the proposed new well are also enclosed.

Copies of the enclosed application have also been sent by certified mail to all offsetting parties owning Eumont Gas Rights. The following is a list of the offsetting Eumont Gas owners:

Re: Revised Eumont Location
State "28" No. 1
W/2 SE/4 & SW/4 NE/4
Section 28, T-19-S, R-37-E
Lea County, New Mexico

Gentlemen:

Please find enclosed a copy of our letter to the New Mexico Oil Conservation Division dated October 15, 1982, requesting a non-standard Eumont proration unit and unorthodox Eumont location for Doyle Hartman's proposed State "28" No. 1, and a copy of the NMOCD's Administrative Order NSP-1336 (L) dated November 1, 1982, approving both the proposed 120-acre non-standard Eumont (Gas) proration unit consisting of W/2 SE/4 and SW/4 NE/4 Section 28, and the requested non-standard Eumont location of 1880 feet from the South line and 2180 feet from the East line of Section 28, T-19-S, R-37-E, Lea County, New Mexico.

After recently having an opportunity to review Marathon's internal well file pertaining to its now plugged and abandoned State A-3071-D No. 1 Eumont gas well located 1980 FSL & 1980 FEL Section 28 (the original Eumont [Gas] producer on this proration unit), it was discovered that Marathon had encountered a major water flow (with a 1400-psi surface pressure) from the Upper Eumont interval at the time a workover was performed on the State A-3071-D No. 1 well in 1977 and because of the water flow, the well was subsequently plugged and abandoned in August of 1978.

In view of the extreme likelihood that the originally proposed twin location of 1880 FSL & 2180 FEL for our State "28" No. 1 would encounter the same water flow Marathon found in its State A-3071-D No. 1, and because of various surface obstructions situated on our 120-acre Eumont proration unit, including a Northern Natural Gas Company high pressure pipeline that runs north and south down the middle of the lease, it is necessary that we move the proposed location for our State "28" No. 1 due south a distance of 1,220' to a new unorthodox location consisting of 660 FSL and 2180 FEL Section 28, T-19-S, R-37-E, Lea County, New Mexico. We are enclosing an amended C-102 showing both the amended location and the existing surface obstructions situated on the lease.

New Mexico Oil Conservation Division
June 22, 1983
Page 2

Although we are forwarding a copy of this letter by certified mail to all offsetting operators owning Eumont gas rights surrounding our proration unit in order to inform them of the necessary location change, it should be noted that our new location of 660 FSL and 2180 FEL Section 28 will not fall any closer to the closest offsetting lease line than the unorthodox location of 1880 FSL and 2180 FEL Section 28 which was originally approved by NSP-1336(L). We are also at this time filing a C-103 to amend our pipe program so that we might have greater drilling control in the event the same high pressure water flow is encountered in our State "28" No. 1.

Please let us know if we can answer any further questions in this regard.

Very truly yours,

DOYLE HARTMAN

Operator Doyle Hartman			Lease State 28		Well No. #1
Unit Letter 0	Section 28	Township 19 South	Range 37 East	County Lea	
Actual Footage Location of Well: 660 feet from the South line and 2180 feet from the East line					
Ground Level Elev. 3579.5	Producing Formation Queen (Penrose)		Pool Eumont (Gas)	Dedicated Acreage: 120 Acres	

1. Outline the acreage dedicated to the subject well by colored pencil or hachure marks on the plat below.
2. If more than one lease is dedicated to the well, outline each and identify the ownership thereof (both as to working interest and royalty).
3. If more than one lease of different ownership is dedicated to the well, have the interests of all owners been consolidated by communitization, unitization, force-pooling, etc?

☐ Yes ☐ No If answer is "yes," type of consolidation _____

If answer is "no," list the owners and tract descriptions which have actually been consolidated. (Use reverse side of this form if necessary.) _____

No allowable will be assigned to the well until all interests have been consolidated (by communitization, unitization, forced-pooling, or otherwise) or until a non-standard unit, eliminating such interests, has been approved by the Commission.
