Chacon Dakota Associated Pool

OIL CONSERVATION DIVISION

SANTA FE

Dear Mr. Ramey:

This is a request by El Paso Exploration Company for administrative approval for a non-standard proration unit for the subject gas well located in the Chacon Dakota Associated Pool.

Reference is made to the special rules and regulations for the Chacon Dakota Associated Pool which states a standard oil proration unit shall be 160 acres and a standard gas proration unit shall be 320 acres.

The Chacon Jicarilla D #18 is currently classified as a gas well which would require the 320 acres of the S/2 of Section 22, T-23-N, R-3-W to be dedicated to this well. However, the Chacon Jicarilla D #5 located in the SE/4 of Section 22, T-23-N, R-3-W is classified as an oil well which requires a 160 acre dedication. Since simultaneous dedication of acreage is prohibited, it is impossible to operate the Chacon Jicarilla D #18 on a standard proration unit.

El Paso Exploration Company operates all offset proration units.

Plats showing the well location and offset ownership are attached.

Sincerely,
G. W. Brink
