RE: Administrative Approval of Non-Standard Proration Unit
San Juan 30-4 Unit #33A Well
830' FNL, 820' FWL
Section 31, T30N-R4W
Mesa Verde / Dakota Dual
Rio Arriba County, New Mexico

Dear Mr. Stogner:

Energen Resources Corporation requests administrative approval of a non-standard spacing and proration unit for its San Juan 30-4 Unit #33A well to be located 830' FNL and 820' FWL of Section 31, T30N-R4W, Rio Arriba County, New Mexico.

The W/2 of said Section 31 is an irregular section containing 205.88 acres, caused by a variation in the legal subdivision of the U.S. Public Land Survey. This results in the spacing and proration unit being 64.43% of a standard gas spacing and proration unit for the Blanco Mesa Verde and Basin Dakota pools. A non-standard proration unit covering the Blanco Mesa Verde was approved under Order NWU-362 in conjunction with the drilling of the San Juan 30-4 Unit #33 well. The #33 well, located 1,590' FSL and 1,100' FWL of Section 31, was drilled as a Mesa Verde well in June of 1960. As the Dakota formation was not included in Order NWU-362 for the previously drilled well, Energen respectfully requests administrative approval of a Non-Standard Proration Unit for the Basin Dakota formation under the subject well.

A copy of this application is being submitted to all offset operators by certified mail with a request that they furnish your office in Santa Fe with a Waiver of Objection.

Attached is a well location plat showing acreage, a topographic plat of the area, and a map showing all offsetting operators.

Sincerely,

Richard P. Corcoran
District Landman
