RE: 2017 Review of Operations
2018 Plan of Development
Gallegos Canyon Unit ("GCU")
San Juan County, NM

Ladies and Gentlemen:

BP America Production Company, as Unit Operator for the GCU respectfully submits for your approval the attached 2018 GCU Plan of Development. Copies of the 2018 GCU Plan of Development have been forwarded to the working interest owners in GCU.

Please signify your approval of the 2018 GCU Plan of Development by signing in the space provided on the attached sheets and returning same to the attention of:

Craig Ferguson
BP America Production Company

Review of 2017 Operations

Shown in Table I are the cumulative volumes of gas and condensate produced from each reservoir in the Gallegos Canyon Unit. Table II summarizes the well status in each horizon. Because Gallegos Canyon Unit has many downhole commingled wells (i.e., producing from more than one formation), Table II reflects completions rather than wellbores. Historical production graphs for each horizon are attached at the end of this document.

TABLE I
Cumulative Production as 11/30/2017

2017 GCU Development Plan of Development Activities

Table III A below shows the status of each of the proposed 2017 recompletion activities from the 2017 GCU Plan of Development. These recompletion candidates were identified when BP performed eight recompletions in the Gallup in 2014. The 2017 planned recompletions were not performed due to low product prices; they have been deferred until market conditions improve. See Table III A for details.

2017 New Well Drilling

There are five active approved permits for new wells to be drilled in GCU. However, as of 12/31/2017, there were no new production wells drilled in 2017. Primary reason for this inactivity was the weak economic environment.

TABLE III C
2017 Plug and Abandon Candidates (as per 2017 POD)

Plugging and abandonment (P&A) of wells has been traditionally one of the main operational activities in GCU during recent years. Reasons to P&A included low productivity of wells in highly depleted zones or high cost for repairing mechanical problems with limited remaining production and reserves potential.

These six wells were plugged and abandoned in 2017 in GCU.

2018 Plan of Development

Following the production results of the 2014 Gallup recompletions, BP will continue to develop the liquid-rich Gallup horizon within the Gallegos Canyon Unit through uphole recompletions of existing Dakota wells. The 2015 plan included 4 recompletions in Gallup reservoirs. This program was deferred in 2017 and is still listed as a deferred option for 2018. BP is also evaluating the possibility of recompleting the GCU 247E to the Fruitland Coal in 2018.

Depending on the specific candidate well, the existing Dakota completion will be plugged and abandoned (PxA), temporarily abandoned (TxA), or downhole commingled with the new Gallup completion. Summary of BP 2018 Gallup program is provided in table IV.

Table V shows the potential horizontal wells to be drilled in Mancos / Gallup formations. Current plan calls for four wells; three in Mancos Shale and one in Gallup ChaCha SW sand and one well to be drilled in the Dakota.
