Attention: D. T. Hansen

RE: Westland Dev. Well NO. 1  
P-1-10N-1E  
Bernallillo County, New Mexico

Dear Ms. Hanson:

This letter is to inform you that this office has not yet received the appropriate forms and data in order for the above referenced well file to be a finalized P & A well. This office needs the following forms and data in order to close this well file:

Form C-103      date T. D. was reached, total depth, data  
of plugging, depths and amount of plugs

Form C-103 statement that site reclamation has been completed and ready for inspection

Form C-105 completely filled out

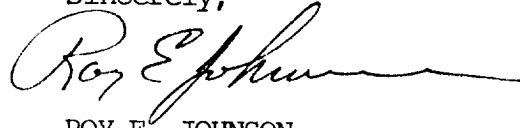

Water well conversion form - completely filled out and  
notarized

Copy of all electric logs

This office has also received numerous phone inquiries from the general public regarding reclamation of your drill site. A recent field inspection has indicated that the reserve pit is dry enough that reclamation can begin at any time.

Your expeditious handling of this matter would be greatly appreciated and if you have any questions, please contact me at this office.

Sincerely,

A handwritten signature in cursive script, appearing to read "Roy E. Johnson", with a long horizontal flourish extending to the right.

ROY E. JOHNSON  
SR. PETROLEUM GEOLOGIST
