DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill to the approximate depth of 500 feet and test the Gallup sandstone. Surface casing will be 50 feet of 7" pipe cemented from top to bottom.  
If production is obtained then 4 1/2" pipe will be set and cemented to total depth.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
