Attention: Mr. R. L. Chance, Claims Dep't

Dear Mr. Chance:

In reply to your letter of April 19; the Oil Conservation Commission sent me a copy of their letter to you dated April 7, wherein they advise that no log of the well has been turned over to them, and if this is not done the well must be plugged from top to bottom with cement.

If this is necessary it means setting up a drilling rig and cleaning out the hole to 3600' and then cementing it, which would be quite costly.

It seems to me it would be advisable to expend every effort to obtain the log information for the Oil Conservation Commission.

Until I know what is required I cannot submit a bid for plugging the well.

Very truly yours,

Harold P. Doty
