Drilling and plugging history
Maxwell #1
1650 FSL, 2970 FEL
Section 27, T 30N, R 23E
Colfax County, New Mexico

The well was drilled with air to a depth of 2240' at which point water entered the hole and from 2240' to TD of 2307', the well was mud drilled. A core was taken from 2245-60' with a recovery of 15 feet of sand and shale without shows of oil or gas.

Scott Bros. Drilling Company drilled the hole on a contract basis. According to their records, the hole was plugged on March 30, 1962 as follows:

35 sx	2175-2275
20 sx	70- 120
5 sx	0- 15

A regulation 5 foot dryhole marker, 4 inch diameter, was installed.
