MAXWELL, N. M.

Horn 2

I have been hoping that Mr Andreas would come up and look the lay of the formation over th t is the surface but it seems that I cant get get any help from any one that knows anything about oil.

Marks case comes up the 29th at Raton I hope they get this cleaned up, then the Tenaja Oil Company expects to start suit to cancell her contract which she has not lived up to and demand our state leases back.

If we had the 10,000 acres of State leases we assigned her to put down the well with the 9000 acres we hold I could get a well put down out there, I understand she has paied up on some of the State leases thinking she will keep anyone else out but that will be determined later. She has done us considerable damage in not putting down the well per contract which we shall ask for when we start suit, of course this is confidential.

We have made enough of a test to know that there is oil out there some place and why lose it all through people like Marks.

Yours truly
