Mr F.J.Horn.,
Santa Fe, N.M.

Dear Mr Horn:-

What about this

The first time you are up this way I would like for you to run a measure on the Marks well, I have a steel measuring tape out at our well which we can use in case you dont have one.

While as president of the Tenaja Oil company and per our contract with Marks I can go on the property anytime for inspection but doubt if I would have the authority to measure it without her consent which I doubt I could get.

She has not been to see me for about three months and ignored our attorneys letter of about three weeks ago to let us know at once what her intensions was to finishing the well.

I have a letter today from the Tex-Mex Cattle company saying the rentals had not been paid by her and that they was cancelling the leases.

I dont know if she has paid up the state leases and where she is drilling or not, you possibly know or can find out.

There is a possibility if a line was run and a test made you might find some oil in the hole and please do not let it be plugged untill there is a test made.

Yours truly

Y. K. Denton

P.S.

We have not drilled out the cement plug yet but expect to start work again the 1st of next wee.

*This hole has a string of tools and 100 ft cable in it
how in h--- can a line be run*
