P. O. Box 871,  
Santa Fe, New Mexico.

Attention: Mr. E. A. Chavez, Geologist.

Dear Mr. Chavez,

On Nov. 8th I wired you upon receipt of your letter. I stated the following day, Friday, the Nelson-Moore Development Company would finish pulling Sauble #2.

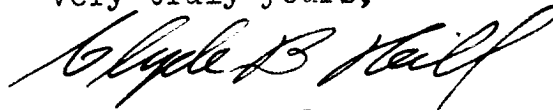

They were thru then but I did not know it. They pulled another joint of pipe and it was the last. They recovered 735 feet. When they entered the hole they found it cemented solid to approximately 735 ft.

When Mr. Moore called Mr. Sauble he agreed with Mr. Moore that the well should be filled with mud, abandoned and marker placed. There was no water from which to make a water well.

You know that I have not received the plugging notice of both wells which Mr. Nelson and I left with Mr. Spurrier. You approved of these verbally here in my home.

Please send my copy so I can file the final plugging report on these two wells.

Very truly yours,

Clyde B. Neill.
