Dear Sir:

Concerning your reports on weekly progress on the above captioned wells in the space provided for "formation at TD" I am more concerned with the lithology rather than geological formations wherein you happen to be drilling. The formation tops may be reported later upon completion of each well and when samples, electric logs, etc., have given you a more reliable picture of the geology and formations penetrated.

Likewise I would appreciate your sending these about mid-week for my receipt of same on Thursday or Friday.

You may report only that information that you think we may publish or divulge to the general public. Total depths may be in round numbers or i.e., "drilling below xx feet" if you so desire.

Enclosed please find a number of blank postcards for your convenience.

Very truly yours,

Eugene A. Chavez
Oil & Gas Inspector
District #1
