Re: Consolidated Minerals Development Corp.
\$5,000 one-well bond, NW/4 SE/4 Sec.
26-31N-23E

Gentlemen:

It has recently been called to our attention that the subject well has not been completed as a producing well, nor has it been plugged and abandoned. Rule 202 of the Commission Rules and Regulations requires that a well shall be plugged and abandoned when drilling operations have been suspended for sixty days unless a permit for temporary abandonment has been obtained from the Commission. Please advise us as to your intentions regarding the subject well.

If drilling or completion operations are contemplated within the foreseeable future, please request a permit for temporary abandonment for a period of time until such operations are commenced. Otherwise, we feel that an effort should be made to plug and abandon the well properly in accordance with Oil Conservation Commission rules as soon as possible.

Very truly yours,

Daniel S. Nutter
District Engineer
