Attention: Mr. Carl Ulvog

Tucumcari FNB No. 1-X Well
Section 20, T8-N, R-22-E,
Guadalupe County, New Mexico

Gentlemen:

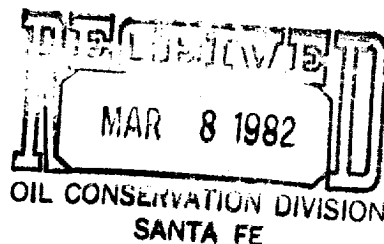

Herewith is our Form C-103 and C-105 reports along with the open-hole logs of the captioned well.

As discussed with you by telephone, this one-point absolute open-flow was obtained by swab assistance. This volume of gas, 88.32 mcfpd, represents the weighted average rate through tubing only.

We are in the process of filling the pits and restoring this location to a level contour and will notify you when it is ready for your inspection.

Your cooperation and help in our New Mexico operations is greatly appreciated.

Yours very truly,

OHB/br
