DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well at the above location with rotary to an approximate depth of 4,500 feet or to test the Pennsylvanian formation.

Proposed casing program is as follows:

10 3/4" surface casing at 100 feet minimum depth cemented throughout its entire length.  
8 3/8" casing if necessary at approximately 1,300 feet cemented with 50 sacks of cement.  
5 1/2" production casing on top of pay cemented with 100 sacks of cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
