INSPECTION REPORT

May 15, 1952

**BAKER & TAYLOR
DRILLING COMPANY**

**Re: O. Dale Smith No. 1
SWNE Sec. 15-7N-22E
Guadalupe County**

The above captioned well has reached a total depth of 5580' and drilling is progressing at an inconsistent rate in carbonaceous to limey shales. For the most part, OWS and OSC bits have been used but W7R bits are now giving best results.

No ditch samples were collected this week as I did not visit the location.

INVESTIGATION REPORT
MAY 15, 1933

Mr. O. Davis Smith No. 1
P.O. Box 122, 12-74-122
Gardens County

DAVIS & SONS
OIL FIELD COMPANY

The above captioned well has reached a total depth of 5500' and drilling is progressing at an inconsistent rate in carbonaceous to limy shales. For the most part, 12-74 and 12-75 have been used but WTR bits are now giving better results.

No such samples were collected this week as I did not visit the location.

E. C. SAWYER,
Geologist
