

G-30-20N-31E: From above to site of well or wells drilled in 1956 by Schwartz Carbonic Company. Letter from Nutter (10/10/56) indicates a "Libby No. 1 Well" was abandoned but plugging reports were not submitted. Inspection of site-in company of Schwartz Carbonic Plant Manager - reveals location of only one well, being Schwartz #1-X Libby, which is producing CO₂. Plant manager insists there never was another well nearby, such as a "#1 Libby." 8/28 CU
