Mr. Spurrier
Oil Conservation Commission of New Mexico
Santa Fe, New Mexico

Dear Mr. Spurrier:

We are contemplating the repair of our wells, Libby No. 1, Libby No. 2, and De Baca No. 2.

I am calling this to your personal attention because I know you are in possession of the facts concerning the requirements to place these wells in good condition and thus prevent the unwarranted loss of natural resources.

It is our understanding that there is some leakage through the casings of Libby No. 1, which would probably require cementing. We are also informed that all three wells might require "bleeder strings".

We would greatly appreciate any advice you will give us in connection with the above and also if it is not asking too much to have your recommendation of one or more firms whom you believe capable of performing this work.

A very early reply would be appreciated as we plan to start the work as quickly as possible.

Thanking you in anticipation of the same, we remain

Very truly yours
