

Memo

From

CARL ULVOG

SENIOR

PETROLEUM GEOLOGIST

To File

M-27-16N-33E

6/16/75: John Webb, Drilling
Supt. for Omega Drilling Co.,
called.

PetroTex #1 Olympic State
was at 1576' when drill pipe
twisted off. Lost 475' of pipe and
drill collars in hole. Could not
get inside of pipe nor drill down
alongside. Will junk hole and skid
rig for new hole.

I requested 25 sack plug at top
of lost pipe (or maximum possible
depth); 10 sack plug at bottom of
surface csg; and 10 sack plug at
top with marker.

Webb phone - Townsboro 461-2591
