OIL CONSERVATION DIV.
SANTA FE

Gentlemen;

Attached is data you requested pertaining to the recently completed workovers on the OXY USA Inc. operated West Bravo Dome Carbon Dioxide Gas Unit Well Numbers 13, 15, and 16. This remedial work, which involved sand fracturing of the Tubb Sandstone Formation, was undertaken to assess the wells for response to such treatments and also to help OXY evaluate Unit reserves and capability of individual wells to produce. By all measures the fracture treatments proved successful, and test results are currently being evaluated for future potential applications on the Unit.

By attachment, I am enclosing the tabulated data you requested. If you want the raw data as well, please let me know and I will forward it to you.

Respectfully Yours;

A handwritten signature in cursive script, reading "Jerroll G. Sillerud".
