

February 18, 1938.

Mr. O. G. Stevens, President, Sestern Freezit Corporation, Mosquero, New Mexico.

Dear Mr. Stevens:

I will attempt to answer your letter of February 16th and by so doing I thin I can clear up several points brought to my attention.

At the earliest convenience I hope to contact you personally so that it will not be necessary to carry on correspondence for an indefinite time.

two of these occasions have talked with you personally and you were very reticent and uncommunicative and at those times the waste of sas was very obvious. It was not being retained or recycled to be used assim but was disippated in the air.

stated that the well was being that in because no crilling bond had been filed with the Cil Conservation Commission. Whether this was your fault or not, and I am sure it was not, it makes no difference to the Cil Conservation Commission and if it prevented you from carrying on your operations, it was also as much your duty to insist that this drilling bond be posted as it was ours. We are not serving this paper, or notice, on you personally or your company as manufacturer, but on the well, and your watchman at the plant read the notice and understood, so he said, that the paper was being served to shut in the well until a drilling bond had been filed with the Oil Conservation Commission.

going to post the well because of lack of an acceptable drilling bond and advised him at the time, if he contemplated doing any more drilling in Harding County it would be financially advantageous to him to secure a blanket drilling bond. He realized this and is expecting to get a blanket bond covering all of his operations, and when he does, this blanket bond will cover the De Baca well where the plant is located.

You state on page 1 of your letter, in the last

I hope that this well settle the controversy and it wis not the intentions of the authors of the pamphlet to deliberately cause you any trouble, and I do not feel that I can conscientiously retract the statement made in next to the last paragraph on page 8 of the pamphlet.

As I hav stated before, I will be very glad to have a talk with you and if you intend to come to tanta Fe it would be advisable for you to telephone and make an appointment because very often I am out in the field.

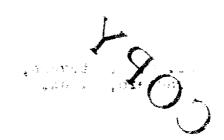

Very truly yours,

A. AMDREAS ACTING STATE GEOLOGIST
