1. The first part of the paper is devoted to the study of the

properties of the function $f(x)$.

2. In the second part, we consider the case when $f(x)$ is

continuous. We show that in this case the function $f(x)$ is

continuous at every point of the interval $[a, b]$.

3. In the third part, we consider the case when $f(x)$ is

discontinuous. We show that in this case the function $f(x)$ is

discontinuous at every point of the interval $[a, b]$.

4. In the fourth part, we consider the case when $f(x)$ is

continuous at some points and discontinuous at others.

5. In the fifth part, we consider the case when $f(x)$ is

continuous at some points and discontinuous at others.

6. In the sixth part, we

consider the case when

$f(x)$ is continuous at some points and discontinuous at others.

7. In the seventh part, we consider the case when

$f(x)$ is continuous at some points and discontinuous at others.

8. In the eighth part, we consider the case when

$f(x)$ is continuous at some points and discontinuous at others.

9. In the ninth part, we consider the case when

$f(x)$ is continuous at some points and discontinuous at others.

10. In the tenth part, we consider the case when

$f(x)$ is continuous at some points and discontinuous at others.

11. In the eleventh part, we

consider the case when

$f(x)$ is continuous at some points and discontinuous at others.

12. In the twelfth part, we consider the case when

$f(x)$ is continuous at some points and discontinuous at others.
