

NEW MEXICO OIL CONSERVATION COMMISSION  
Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in TRIPLICATE to the District Office, Oil Conservation Commission, before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

(Place)

(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the... Jeffroy No. 1 well

R. W. Filkey Partnership

(Company or Operator)

Well No. 1 in SWSW

(Unit)

1/4 of Sec. 21, T. 23 N., R. 22 E., NMPM., Wildcat Pool

(40-acre Subdivision)

Flora County.

FULL DETAILS OF PROPOSED PLAN OF WORK

(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

5 1/2" pipe was set to a T. D. of 1053'. Pipe was perforated from 1018' - 1028'. 1700 gallons of diesel fuel was pumped into formation to break pressure and mud block which still is apparent. Within a week unless the pressure block is eliminated it is planned to shoot the well at perforated section.

The well was plugged back from T. D. to approximately 1030' where a hydromite plug was set to shut off water encountered at approximately 1053', the shut-off having been successful.

There is reason to believe that a commercial producing well may be had when work has been completed although the well is being drilled as a tight hole.

In the event that the well requires shooting with nitro, the Conservation Commission will be notified and permission requested. (Work has been temporarily suspended until rig can be brought in from Oklahoma to complete well.)

Approved...
