Sounds good. Thanks for the update. We're watching on our end as well.

Sara,

Just wanted to give you a heads up that I touched base with the BLM yesterday and they're still working through some things. They're "hopeful" that leases will be issued in the next 2 months.

Mike

Mike,

It was nice chatting with you the other day. Thanks for sending over your questions. Unfortunately, we don't share the requested data (other than what is available publicly through the NMOCD) with anyone other than partners that have paid their proportionate share of well costs. Please let me know if you have any technical questions in regards to the AFEs we sent over.

I show that Flat Creek received the proposals mid-March so the 30 day election clock has expired. We are willing to give you a two week extension to give us some more time to work through the JOA. At this point I do not have approval to give any more time than that as we are getting some pressure from accounting to get JIB decks set up.

Feel free to give me a call to discuss to further.

Thanks,
Sara

Sara,

Below is a list of technical questions/requests that we have:

- We'd like daily production data for Norris Thornton 204H (oil, gas, water) along with tubing head pressure and choke settings.
 - The same data would be helpful on the two vertical Morrow wells.
- Production lags behind neighboring wells. Would like to know Matador's thoughts on why or if it just related to how they are flowing back.
- What log data is available from pilot holes / vertical wells?

Let me know if it would be easiest for you to get the questions answered or to put your engineer in touch with ours.

Also, can you confirm that we're not on the clock with these elections until we get the JOA worked out?

Thanks and hope you have a great trip! I'll get the Morrow CA's sent back to you shortly...still have some questions on the Wolfcamp CA.

Hi Mike,

Send me over a list of the questions your team has and we'll work on getting them answered. Give me shout at your convenience to discuss the CA and JOA.

Thanks,
Sara

Sara,

Sorry that we played phone tag last week. Can you put us in touch with the proper technical person to assist with some questions we have regarding the 3 producing wells that've been proposed to us?

Also, I'm out of the office today but will try to give you a ring tomorrow to discuss the CA's and JOA.

Thanks,

Mike Gregory, CPL
