

From: Marjorie Davis
Address: 9709 Glendale NE
City, State, Zip: ABQ, NM 87122

Dear OCC Commissioners,
I am writing to ask you to approve the Application to amend the Commissions's rules to address PFAS, Case No. 23580, because:

- PFAS and PFOA pose a significant and growing threat to our health, accumulating in water, soil and our bodies over time, and causing cancer, birth defects and endocrine disorders.
- Oil and gas industry operators hide under the cover of "trade secret" protections and claim that they are no longer using PFAS or PFOA for oil and gas drilling, but that claim does not have the force of law, and without disclosure requirements, cannot be verified or enforced. As they did in California and Colorado, fracking fluid ingredients can be disclosed without specifying exact formulas.

Please use your authority to protect New Mexicans from these forever chemicals. Once contaminated, there is no going back.

Commissioners,

You are asked to approve the Application to amend the rules to address PFAS, Case No. 23580, because:
PFAS pose a significant and growing threat to our health, contaminating in water, soil and our bodies over time, causing cancer, birth defects and endocrine disorders. Industry operators hide under the cover of "trade secrets" and claim that they are no longer using PFAS for oil and gas drilling, but that claim does not hold up under the law, and without disclosure requirements, PFAS are not tracked or enforced. As they did in California and Texas, PFAS containing fluid ingredients can be disclosed without revealing their formulas.

Authority to protect New Mexicans from these chemicals. Once contaminated, there is no going back.
