Describe Cause of Problem and Remedial Action Taken.\*

The 6" unloading line from the truck unloading rack to Tank 5201 developed a leak inside the tank retaining dike. The line was blocked in at the tank, line depressured and a clamp was installed at the leak. Leak was a result of external corrosion.

Describe Area Affected and Cleanup Action Taken.\*

An area approximately 4 feet wide and 20 feet long and 18 feet deep was stained with crude oil. There was no free liquid. Stained soil will be dug out and disposed of at permitted disposal site and fresh dirt placed in the excavated area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
