| Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No | If YES, Volume Impacting the Watercourse | |

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Devon employees found a 3 inch polyline buried about 3 foot down. The end of the polyline had a union with a 2 foot piece of fiberglass pipe and a 3 inch valve. The fiberglass pipe appeared to have broken away from the fiberglass coupling attached to the union by pressure creating the spill. Devon employees removed the union off of the polyline and replaced it with a 3 inch valve and bull plug stopping the water seepage. This location is Plugged and Abandoned. The spill is on the East side of the location with total of 12 bbls which 4.5 bbls of that went to the pasture on the southeast side of pad. 3 bbl of mixture was picked up by vacuum truck.

Describe Area Affected and Cleanup Action Taken.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
