**RECEIVED**

By OCD; Dr. Oberding at 1:47 pm, Apr 14, 2015

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* A fiberglass line cracked releasing fluid over the pasture. The well was shut in and line repaired. Vacuum trucks were dispatched to pick-up standing fluid.

Describe Area Affected and Cleanup Action Taken.\* The release area covered 6,853 sq ft of the pasture to the west of the #157 lease pad. A path forward will be submitted to NMOCD after delineation efforts.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
