Describe Cause of Problem and Remedial Action Taken.\*

Stress/ fatigue caused a fire tube gasket on the south middle test separator to leak 25 bbls of oil and 5 bbls of produced water onto the ground. The gasket was replaced and 8 total bbls of fluid were recovered via vacuum truck.

Describe Area Affected and Cleanup Action Taken.\*

The affected area is approximately 70' x 80' on location inside the facility. Remediation will be completed in accordance with a remediation plan approved by NMOCD.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
