NATURE OF RELEASE

Type of Release	Crude oil and natural gas	Volume of Release	125 bbls fluid and 203 MCF Natural Gas	Volume Recovered	90 bbls crude oil
Source of Release	12 inch natural gas pipeline	Date and Hour of Occurrence	Unknown	Date and Hour of Discovery	8/14/2007; 4:45PM
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required				
By Whom? Tony Savoie	If YES, To Whom? Gary Wink On-Call NMOCD				
Was a Watercourse Reached?	Date and Hour: 8/15/2007; 7:58AM				
	If YES, Volume Impacting the Watercourse.				
	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No				

a Watercourse was Impacted, Describe Fully.*

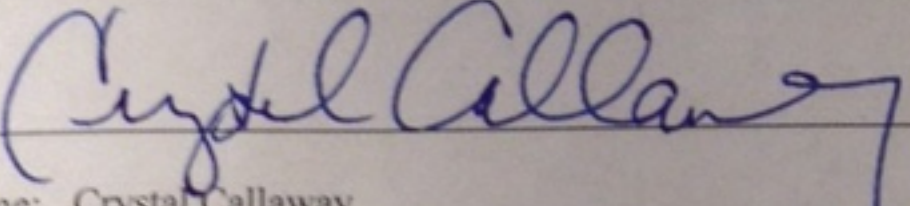

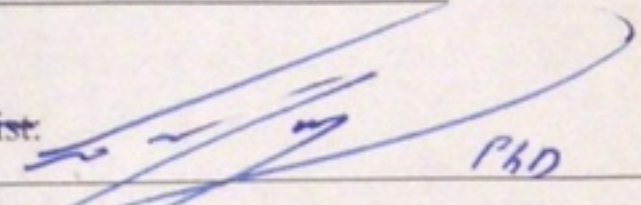

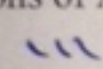

Describe Cause of Problem and Remedial Action Taken.*

A natural gas gathering line developed a leak and crude oil and natural gas were released. Initially a vacuum truck recovered free standings liquids, subsequently affected soil was excavated.

Describe Area Affected and Cleanup Action Taken.*

The affected soil was removed during excavation activities. Excavation was conducted between August 2012 and January 2013. The final excavation was irregular and extended away from the main area of impact where delineation was conducted. The size of the excavation was approximately 210 feet in length and ranged from approximately 80 to 150 feet in width and from approximately 4 to 23 feet in depth. Confirmation soil samples were taken from side walls and the base of the excavation to enable delineation of affected soil. Soil affected by the release of crude oil has been excavated and a liner has been installed in a manner appropriate to meet criteria agreed upon by the OCD. A 20-mil polyethylene liner was installed in the excavation and covered with clean backfill sand and soil that meets the OCD's predetermined criteria. Consistent with OCD guidance, the placement of the liner is intended to limit the infiltration of surface water and protect groundwater from future migration of COCs. The closure request (dated April 13, 2015) summarizes remedial activities.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
