Kellie,

This is an update on the Richardson SWD. As previously reported, we have hauled off all the rain water and the fresh water that was used to put out the fire. We hauled off \$7,000 dollars -worth of water and \$13,000 dollars-worth of contaminated fluid to the Gandy Marley land farm. We have run soil samples and the results are recorded with OCD.

We had 5 inches of rain at the time of the fire, and had to let the location dry out some so we could clean up the location .

As of now, due to all of the holidays and 15 inches of snow, we have been slow to run more soil samples due to weather. However, we do intend to run more soil samples as soon as we can to see what we need to do next.

I personally took a measuring wheel out to the location, and the closest water well is 763 feet from the point of the fire to the north west which is up radiant; also 585 feet from my location to west fence of neighbor's fence.

I have attached a map for your information.

If you have any questions or comments, please do not hesitate to contact me.

Danny R. Watson

Danny,

Here is the latest.

Thanks,

Kellie Jones

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
