RE: El Paso Natural Gas Company Line No. 3031 Inadvertent Release – Rupture No. 7
Request for Closure of RP No. 4415

Dear Ms. Lynch,

El Paso Natural Gas Company (EPNG) is formally requesting the closure of RP No. 4415. This RP number was assigned to the notification record for the inadvertent release of hydrostatic test water (Rupture No. 7) during the spike test of EPNG's Line No. 3031 located in Lea County, New Mexico. The attached document includes all of the documentation and email correspondence related to the rupture event which took place on August 9, 2016.

Included in the attached document:

- Final Form C-141_with signature
- Initial Form C-141_with signature
- Email Correspondence related to the assignment of RP#
- Email Correspondence granting permission to backfill the open trench at rupture site
- Soil Analysis Report
- Water Analysis Report

Thank you very much for your assistance with the NMOCD process and documentation of this hydrostatic test rupture event. Please feel free to contact me if you have any questions or require any additional information.

Sincerely,

Sheila D. Castellano

Was a Watercourse Reached? ☐ Yes **X No**	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
EPNG was conducting a hydrostatic spike test of the existing L3031 and the pipeline failed during the test. Test was stopped. Water and soil samples were collected for analysis using Test 8260B.

Describe Area Affected and Cleanup Action Taken.*
Test water release flowed along to the existing right of way and to the east, approximately 35-feet beyond EPNG's existing right of way boundary.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Mr. Griswold,

Attached are El Paso Natural Gas Company's (EPNG) submittal of Form C-141, as NMOCD's required Written Notification, for the unauthorized releases of hydrostatic test water in Lea County, New Mexico. The events (**RUPTURES #7 and #8**) occurred during a hydrostatic spike test of EPNG's existing 8-inch O.D. Tipperary – Denten Crossover Line (Line No. 3031) on August 9 and 11 , 2016.

Also included in this email is EPNG's Soil and Water Analysis Tracking Table. This table summarizes the results for all of the water and soil samples collected at each of the rupture locations. The water and soil analysis reports for Rupture Nos. 5 – 8 will be forwarded in a follow up email.

Please feel free to contact me directly if you have any questions.

Thank you,
Sheila Castellano

Case Narrative

Samples for project EPNG Line 3031 Spike Test were received by TraceAnalysis, Inc. on 2016-08-11 and assigned to work order 16081207. Samples for work order 16081207 were received intact at a temperature of 29.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (Titration)	SM 4500-Cl B	111992	2016-08-15 at 13:30	132150	2016-08-16 at 15:00
TPH DRO	S 8015 D	111953	2016-08-12 at 13:00	132108	2016-08-15 at 11:40
TPH GRO	S 8015 D	111948	2016-08-12 at 16:15	132102	2016-08-12 at 16:15
Volatiles	S 8260 C	111989	2016-08-15 at 12:00	132145	2016-08-15 at 12:00

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 16081207 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

1	L-A-B	L2418	Lubbock
2	Kansas	Kansas E-10317	Lubbock
3	NELAP	T104704219-16-12	Lubbock
4		2015-066	Lubbock

Standard Flags

F	Description
B	Analyte detected in the corresponding method blank above the method detection limit
H	Analyzed out of hold time
J	Estimated concentration
Jb	The analyte is positively identified and the value is approximated between the SDL and MQL. Sample contains less then ten times the concentration found in the method blank. The result should be considered non-detect to the SDL.
Je	Estimated concentration exceeding calibration range.
MI1	Split peak or shoulder peak
MI2	Instrument software did not integrate
MI3	Instrument software misidentified the peak
MI4	Instrument software integrated improperly
MI5	Baseline correction
Qc	Calibration check outside of laboratory limits.
Qr	RPD outside of laboratory limits
Qs	Spike recovery outside of laboratory limits.
Qsr	Surrogate recovery outside of laboratory limits.
U	The analyte is not detected above the SDL

Analytical and Quality Control Report

Mary Martino
Kinder Morgan-Colorado Springs
2 North Nevada Avenue
Colorado Springs, CO, 80903

Report Date: August 17, 2016

Work Order: 16081207

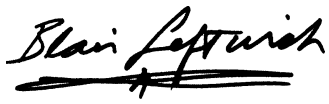
Project Location: Lea County, NM
Project Name: EPNG Line 3031 Spike Test
Project Number: AFE 403828

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
426313	Rupture #7 Release	water	2016-08-09	10:00	2016-08-11
426316	Rupture #8 Release	water	2016-08-11	09:30	2016-08-11

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

TraceAnalysis, Inc. uses the attached chain of custody (COC) as the laboratory check-in documentation which includes sample receipt, temperature, sample preservation method and condition, collection date and time, testing requested, company, sampler, contacts and any special remarks.



Dr. Blair Leftwich, Director
James Taylor, Assistant Director
Johnny Grindstaff, Operations Manager

Case Narrative

Samples for project EPNG Line 3031 Spike Test were received by TraceAnalysis, Inc. on 2016-08-11 and assigned to work order 16081207. Samples for work order 16081207 were received intact at a temperature of 29.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	111971	2016-08-15 at 09:00	132122	2016-08-15 at 09:36
Chloride (IC)	E 300.0	111972	2016-08-15 at 09:00	132123	2016-08-15 at 09:36
TPH DRO	S 8015 D	111970	2016-08-15 at 13:00	132127	2016-08-16 at 09:03
TPH GRO	S 8015 D	111947	2016-08-12 at 16:15	132100	2016-08-12 at 16:15
Volatiles	S 8260 C	111988	2016-08-15 at 12:00	132144	2016-08-15 at 12:00

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 16081207 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

3	NELAP	T104704219-16-12	Lubbock
4		2015-066	Lubbock

Standard Flags

F	Description
B	Analyte detected in the corresponding method blank above the method detection limit
H	Analyzed out of hold time
J	Estimated concentration
Jb	The analyte is positively identified and the value is approximated between the SDL and MQL. Sample contains less then ten times the concentration found in the method blank. The result should be considered non-detect to the SDL.
Je	Estimated concentration exceeding calibration range.
MI1	Split peak or shoulder peak
MI2	Instrument software did not integrate
MI3	Instrument software misidentified the peak
MI4	Instrument software integrated improperly
MI5	Baseline correction
Qc	Calibration check outside of laboratory limits.
Qr	RPD outside of laboratory limits
Qs	Spike recovery outside of laboratory limits.
Qsr	Surrogate recovery outside of laboratory limits.
U	The analyte is not detected above the SDL

Sheila,

After review of your data, permission to backfill Rupture Sites 5,6,7, & 8 is granted. Please submit final C-141s for final approval following backfill of your sites.

Thank You,

Kristen D. Lynch

Mr. Keyes,

EPNG would like to request permission to close the open trench at rupture site numbers 5, 6, 7 and 8.
I would also like to speak with you regarding rupture site #2 and OCD's request for delineation at that location.
Please let me know when would be a good time to give you a call.

Thank you,
Sheila Castellano

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mr. Griswold,

Attached are El Paso Natural Gas Company's (EPNG) submittal of Form C-141, as NMOCD's required Written Notification, for the unauthorized releases of hydrostatic test water in Lea County, New Mexico. The events (**RUPTURES #7 and #8**) occurred during a hydrostatic spike test of EPNG's existing 8-inch O.D. Tipperary – Denten Crossover Line (Line No. 3031) on August 9 and 11 , 2016.

Also included in this email is EPNG's Soil and Water Analysis Tracking Table. This table summarizes the results for all of the water and soil samples collected at each of the rupture locations. The water and soil analysis reports for Rupture Nos. 5 – 8 will be forwarded in a follow up email.

Please feel free to contact me directly if you have any questions.

Thank you,
Sheila Castellano
