Mr. Lowe,

We will remove the liner and dispose accordingly. If there isn't any other restriction, we will proceed with the closure of the pond and removal of the 3 below grade tanks.

Thank you,

Mr. Ochoa,

The NMOCD Rules and Regulation do not allow the placement of liners in place.

llowe

Hi Mr. Lowe,

Do you know what is the status of the Closure Plan for the Deming Compressor station? If possible, we would like to finish this project before the end of the year. Please let me know if you have any questions or If you need additional information.

Thank you,

Cesar G. Ochoa, P.E.

Dear Mr. Lowe,

In order to close the El Paso Natural Gas Company's Deming Compressor Station Discharge Permit No. GW-147, on April 2, 2013, we submitted the attached closure plan. We are getting ready to proceed with the closure of the pond and removal of the three below grade tanks, but I would like to request two changes to our scope of work:

1. Instead of removing the Liner and take it to a landfill as described on the Appendix B of the Closure plan, we would like to fold it in to the center and leave it in place, then backfill the pond.
2. Appendix B of the Closure plan states that we will backfill until the final layer reaches an elevation of 18 inches above the surrounding natural grade level. To avoid the need of bringing backfill from outside, we would like to use the existing berms to reach an elevation of no less than 3-4 inches above the surrounding natural grade level.

Please let me know if you approve my request or if there's any concern. If you have any questions you can reach me by email or at 915-587-3694.

Thank you,
