Ms. Haskell,

The NMOCD has reviewed the closure request for the Eata Fajita 8 State SWD #001 (30-025-40845) release on 12/27/2019. The available information indicates that the requirements of 19.15.29 NMAC have been met and no further corrective action is required. NMOCD considers administrative order **1RP-5326** closed. However, this determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Thanks,

Dylan Rose-Coss

To Whom It May Concern,

A final inspection has been conducted regarding the clean-up efforts made at the above mentioned lined facility. Free fluids were removed and if present the impacted gravel was removed from the liner and taken to a NMOC approved disposal facility. The liner was inspected for damage and found to have liner integrity to contain free fluids. Please see the attached Final C-141 and picture taken during the final inspection conducted by a COG HSE representative.

Thank you,

DeAnn Grant
