Subject: RE: Remediation Plan 1RP-5237

Mr. Baker,

Thanks for the update. Please note: if the tanks are staying in place, then ensure that when remediation and final sampling take place, that any contamination that is not removed due to proximity to the tanks is fully delineated. Additionally, if remediation is unable to remove all of the contaminants near the tanks, then a deferral request is required as part of closure.

Otherwise the remediation plan for the Big Kick Battery (1RP-5237) is accepted. However, this determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations. Please notify the OCD 2 days prior to commencing with the final remediation and sampling event.

Regards,

Dylan Rose-Coss

Mr. Rose-Coss,

The excavation in the vicinity will be hand excavated with the tanks in place. Thanks and have a good day.

Subject: [EXTERNAL] RE: Remediation Plan 1RP-5237

Mr. Baker,

The OCD has reviewed the remediation workplan for the release at the Big Kick Battery (1RP-5237). During review the question arose as to what Apache proposes to do with the tank batteries during the site excavation. Will the tanks be moved, or are they to stay in place?

Thanks,

Dylan Rose-Coss
