13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be perfonned or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomplection in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Requesting approval for surface disturbance to address the remediation of the site (amended C141 sent to NMOCD & BLM on 6/20/2019). As the release borders a lease road, Devon does not foresee the need of a buffer of more than five feet around the edges of the excavation to access and remediate the site.

Estimated start date: July 8, 2019

The release area will be excavated to the NMOCD Closure Criteria, the top four (4) feet of impacted areas off the well pad will be excavated and backfilled meeting the Reclamation requirement of 19.15.29.13(D)(1). SMA will guide the excavation by collecting composite soil samples for field screening for chloride using an EC meter. Approximately 4600 cubic yards of contaminated soil are projected to be removed and replaced with clean backfill material in order to return the surface to previous contours.
