Mr. Medina:

The New Mexico Oil Conservation Division (OCD) has completed its review of the attached environmental information.

Based on OCD's review of the environmental data, there appears to be a release(s) at the facility.

The OCD Bureau Chief has directed me to inform you that Basic Energy Services will need to follow [19.15.29 NMAC](#) and the [C-141](#) Fee Submittal Process.

OCD cannot inspect the facility until it has been investigated, remediated and restored to the final condition for OCD Hobbs inspection.

Thank you for contacting the OCD.

Subject: RE: Basic Salado Brine SWD Analytical and Sample Map

Before we took over the cleanup of the site, someone excavated underneath one of the concrete pads, down to almost 6 feet. We are not entirely sure why this was done. Also, by removing the remaining concrete pads, we left much ground disturbance. Also, we removed quite a bit of underground lines. This is why we want to involved in the walk through as well, in case we have missed anything.

Subject: Fwd: Basic Salado Brine SWD Analytical and Sample Map

Good afternoon.

Attached is an analytical table from the results obtained at the Salado SWD site, along with a sample map of the sample locations. Please review and please let us know if these results are acceptable for closure. We are I. The process of generating the closure report, but it will not be complete until after we return to the site for backfill and grading.

Cc: Griswold, Jim, EMNRD; Rickman, Leslie, EMNRD
Subject: BW-25 (Basic Energy Services Salado Well No. 2 API# 30-025-32394
Attachments: 30025323940000_54_wf.pdf

Jason and Gary:

The New Mexico Oil Conservation Division (OCD) Hobbs District Office (DO) had inspected the brine well facility on 11/3/2016 for closure and release of the well, but did not release the well because there was surface equipment requiring decommissioning, and environmental sampling required by OCD.

OCD-SF requires submittal of the environmental report based on the sampling conducted at the facility for final review. The DO should be contacted for the final surface inspection. OCD will internally communicate on the environmental report and inspection to finally close and release the well site, if conditions warrant. The DO may also want to contact James Amos with BLM for a joint inspection if it feels it beneficial to do so. However, OCD should contact BLM to let them know OCD is working to close the facility and release the well so BLM may also complete their inspection, etc. at the same time as a courtesy.

Please contact me if you have questions.

Thank you.

David:

The New Mexico Oil Conservation Division (OCD) will be reviewing the WQCC Discharge Permit and Closure Requirements. Basic Energy Services (Basic) may want to review the permit to determine if there are any outstanding actions that need to be completed in order for the site to be released.

OCD-SF will be coordinating with our Hobbs District Office to make sure the permit satisfies the WQCC Regulations before releasing the site. If Basic would like to propose closure under the permit and work to address the closure requirements, OCD-SF believes this is the "path forward" to release the site.

Please contact me if you have questions. Thank you.

Subject: Salado BW No. 2 API# 30-025-32394 (BW-025) Basic Energy Services C-103 Plug and Abandonment Final Report

Mr. Alvarado:

Good morning. The New Mexico Oil Conservation Division (OCD) recently reviewed the above subject file and notices that the C-103 Final Report for the NOI to plug and abandon the above subject brine well has not been received by OCD.

Could you please provide the status of plug and abandonment of the well? If the well has been plugged and abandoned, OCD requires a C-103 Final Report.

Thank you.
